License Key

Paste

Register Quit

Loading example model

- Open the AssistAR application
- Click on Open Model icon to load the sample file (RBOP) that you received with your download.
- Click “Start positioning” to start the process

- Place the box on a white area (or paper) and follow the instruction as shown in the following movie

Lean by example

Closing the Camera Box

Perform 3D Position

Guidelines :

- Try to select some of the points on different faces.
- If you are getting blocked areas for point selection, Change the box angle to the camera.
- Try to select point on surfaces next to the corners and not the corners themselves.

Follow the AR Instruction

We want to hear you

AssistAR is a new and innovative product.
